BRYT (Aptus Windows Pvt. Ltd.) offers solutions for "uPVC Doors and Windows". Our company has state of the art machinery setup for uPVC profiles, followed by quality installations and excellent after sales service and maintenance. With architectural background we have been continuously innovating to provide very best to our customers.

The concept of Window system has been well accepted in USA, EUROPEAN COUNTRIES, AND SOUTH EAST ASIAN COUNTRIES, and the old Aluminum / Steel / Wooden Doors and Windows are now outdated. In most of the Western countries, today, only uPVC Windows and Doors are being used.

BRYT specializes in the manufacture and supply of superior uPVC windows and doors. The process of manufacture and the nature of the products require that particular emphasis is placed upon technical expertise, production capability, product performance, safety requirements and quality management. The company is dedicated to a quality policy which will ensure that its products and services meet the requirements of our customers at all times.

uPVC Windows and doors provides superior aesthetic and functional capabilities, enhancing the quality of life across the world. In India, it is a futuristic product which answers the changing ethos in architectural evolution and urban paradigms. These windows and doors offer many features like weather proof, anti- termite, maintenance free, thermally and acoustic insulation, etc. The window frames are designed aesthetically and offer versatile solutions to different types of application needs. Options include side opening, top opening and bug screens.

At BRYT state-of-the art door and window production unit, this contemporary materialism crafted into precise and unique and exiting customized solution that meet the exaction needs of architects, interior designers and home-owners.

The Complete Solution

Standing tall alongside the vision, aesthetics and environmental sensitivity of architects and designers, BRYT presents a range of doors and windows system to bridge the leap from drawing board to reality with an ease and precision of engineering that translate into no compromises.

Combining strength and durability with exquisite style, BRYT uPVC doors and windows conform to the most stringent international benchmark which not only places them amongst market leaders in this product category but guarantees you absolute satisfaction. Today, uPVC has lived up to its promised potential as building material of the future. There are many landmarks in recent global architectural history that do incorporate the material in their designs. From skyscrapers to aero plane, uPVC find the ready acceptance in all state-of-the-art designs. It's strength, durability and versatility of forms as well as cool color and finishes, makes it an ideal substitute for steel and wood in door and window frames, sills, fascia and siding or weatherboarding.

Customized Elegance

In any building today, be it residential or commercial, doors and windows have been transformed from being standard functional apertures, to an expression of the essence of the structure. Walls no longer restrict or enclose but merely define a space the continuity between inside and outside are underling by the visual openness of doors and windows.

BRYT offers the most varied range of contemporary styles and designs in white and natural wood finishes and myriad hues. Slim frames and higher visibility of the glass surface colored gasket sad to the aesthetic quality of the white window while customized production ensures that quality, and your world, is never compromised.

Dust Proofing

The sealing in BRYT door and window systems is calibrated to achieve excellent air tightness of less than 0.1m³/hr./m² @ 10Pa. this effectively stops dust drifting in from outside and hence drastically reduces the time you'll need to spend cleaning your home.

No Rotting, No Painting, No Corrosion

Unlike other material like wood, Alternative Frames do not require periodical repainting or maintenance. These windows are free from the attack of acids, alkalis, waste gases and salts. uPVC profiles are rot-proof and resistant to atmosphere pollution, including range of acids and alkalis. This renders them more economical in long run.

High Wind Load Performance

The wind load capacity of Aptus window systems have verified at a range of 3500 - 6300 Pa. In other words BRYT windows are built to withstand the gustiest storm conditions, which make them an ideal choice in high-rises and coastal areas.

Excellent Durability

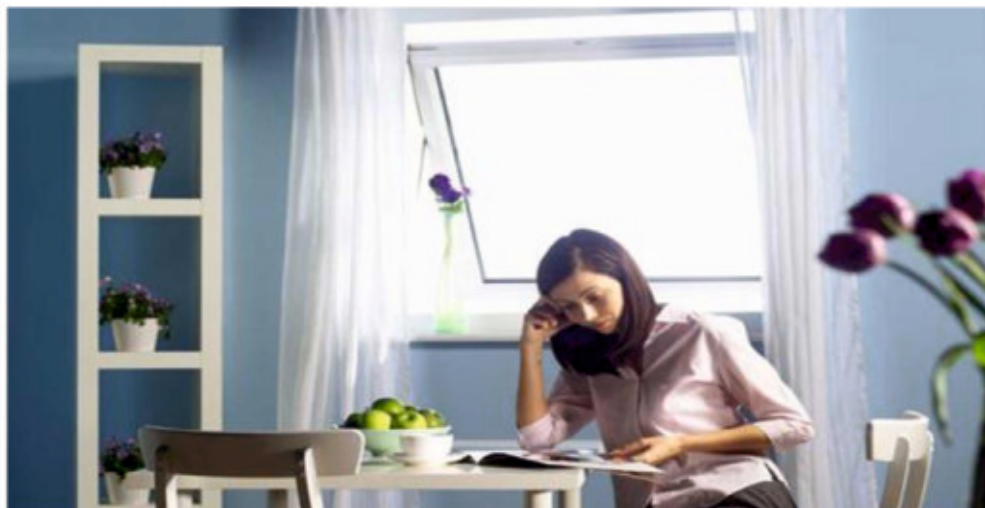

Modern technology and the nature of the material make uPVC a highly durable material, which means a good long term investment. By choosing BRYT you get the added assurance of a brand trusted in quality fitting and finishes. Regardless of what climate they are battling against, BRYT doors and windows will not bow down to dirt, rust and termites. Repair, paint and expensive maintenance are not needed, use of soap and water is enough to restore the attractive finish.

Sound Proof

Noise, in today's world, can be unbearably intrusive. Protection from the cacophony of the outside world has become an essential feature of door and window systems of both home and commercial establishments. BRYT uPVC door and window systems have a multi-chamber profile with double seal that ensures inherent insulation against infiltration. Installed with appropriate glazing which can reduce sound upto 40 decibels, the level of soundproofing and therefore protection against noise pollution increases remarkably.

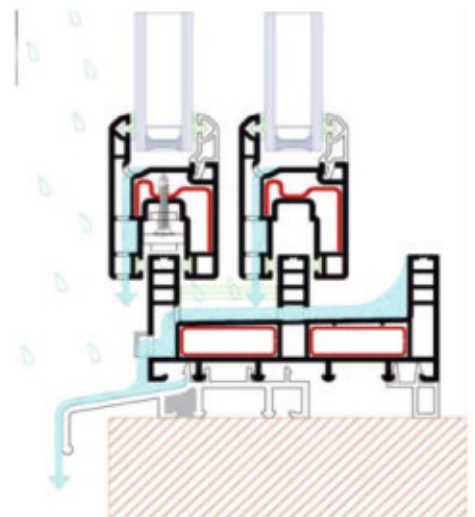

Normal Decibel	Types of Noise
0	Absolute Quiet
10	Desert Silence
20	Whispering
30	Quiet Countryside
40	Normal Voices
50	Quiet Apartment
60	Loud Voices
70	Busy Street
80	Heavy Traffic
90	Orchestra
100	Metro Arriving
110	Lawn Mower
120	Car Horn
130	Aircraft Engine

Water Tightness

BRYT window profiles incorporate ample overlap between frame and sash, as well as dual compression gaskets, to prevent both dust penetration and water infiltration.

So your home stays absolutely dry however it might rain outside.

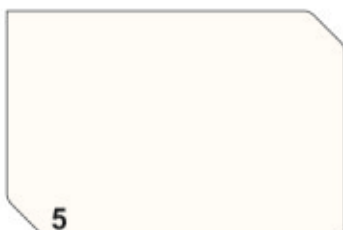

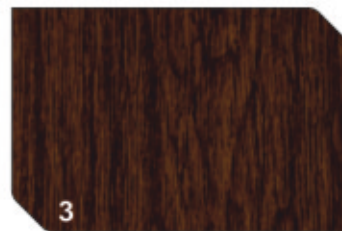

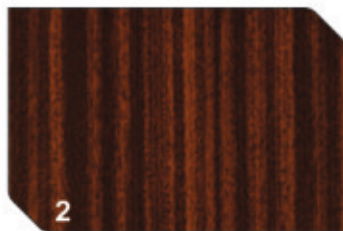

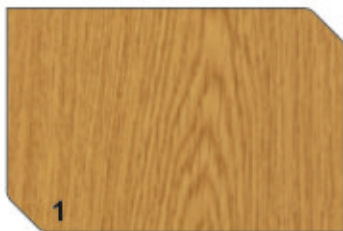

STRONG & SECURE

Every window have a key lockable option. The security protective hinges, strong locking systems and lockable handles are all designed to keep intruders out. Stable, high-impact resistant, reinforced steel windows cannot be opened from outside, while the basic structure of the 100% internal glazing makes it impossible for the glass to be removed from outside, making break-ins very difficult.

In addition BRYT uPVC is naturally frame retardant and will not increase the fire load of the building. Not only does it support combustion but are actually self-extinguishing which means that it will not cause, support or inflame a fire therefore may prevent its spreading. Since uPVC is highly fire resistant, it is widely used in exterior construction materials such as window profiles, siding boards, or interior housing materials, such as wall-covering and flooring. It is also used in industrial facilities such as tanks, ducts, parting strips, or for sign boards.

BRYT Allure

The BRYT allure is a range of aesthetically outstanding windows crafted to complement the grace and beauty of architectural design. They are available in various pleasing shades as well as range of wood finishes.

1. Natural Oak
2. Mahogany
3. Dark Oak
4. Golden Oak
5. Ivory
6. Walnut
7. Ash
8. Macore

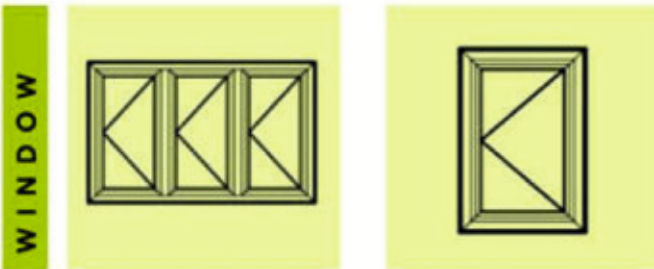

DOOR + WINDOW STYLES

matching your vision

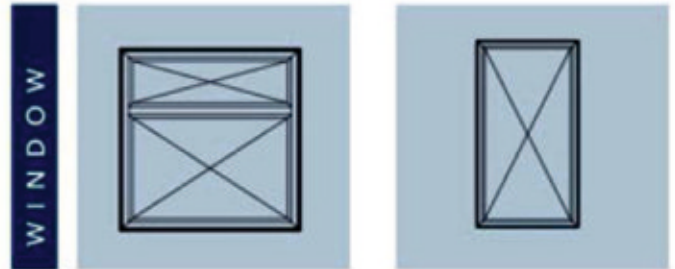

Providing complete window solutions, from initial design to production and final installation of window system for both home and commercial use, BRYT has established itself as a supplier of precision engineered uPVC products that meet the most stringent benchmark. With a range of products that are custom designed, fabricated and fitted to suit the particular requirements, you can be sure that whatever your design or specification, BRYT has a solution - of a style and elegance above the ordinary.
